## PLAF, AF & PAF AIR FILTERS

Industrial, disposable air filters are constructed with a rugged, moisture resistant cardboard frame, graded density media pad, and metal support grids. These durable products are intended be used in all types of industrial applications . Disposable air filters are available with **Fiberglass, Polyester or a Pleated Blend of Synthetic and Natural Fibers Media** , and measure 1", 2" and 4" in thickness. CHEMCO MFG. CO. INC. stocks a variety of standard sizes, ranging from: 16"x20", 20"x20", 20"x25" and 24"x24". All panel filters are packaged 12 to a carton.

*PANEL FILTERS*

### PLAF - PLEATED BLEND OF SYNTHETIC AND NATURAL FIBERS WITH CARDBOARD FRAME

- 1", 2" and 4" expanded surface pleated panel filters supported by metal grid on one side. The grid provides extra strength and helps maintain the proper pleated configuration throughout the life of the filter.
- Constructed using reinforced media for stability and durability.
- Offers high dust holding capacity and maximum efficiency
- Average efficiency is 25-30%, and ar-  
restance reaches 90-93% based on  
ASHREA Test Standard  
52.1-92  
Completely disposable and inter-  
changeable with other panel filters  
without modification to existing equip-  
ment.
- U.L. Class 2

### PAF- POLYESTER WITH CARDBOARD FRAME

- Cardboard Frame is bonded to filter media and metal support grid using heat seal.
- Resinated, 100% non-woven Polyester media provides resistance to moisture.
- Metal grid on the air exit side maximizes filter face area and expands service life.
- U.L. 900 Class 2

### AF - FIBERGLASS WITH CARDBOARD FRAME

- 1" & 2" adhesive coated fiberglass media with cardboard frame
- Light to medium dust loading capacity
- Scrim backing on the air leaving side.
- Removes pollen, plant spores, pet dander, lint and other contaminants.
- U.L. 900 Class 2
