
The CHEMCO ADVANTAGE

New, Exclusive **AQUA-PAD™**

THE PAINT OVERSPRAY COLLECTOR DEVELOPED SPECIFICALLY FOR WATER BASED COATINGS

To better meet the rigid standards of the Federal Clean Air Act, industry is now using more water based coatings in spray booths and reducing the use of coating having a high VOC content.

Paper, cardboard and certain other overspray collectors are water soluble and begin to break down as they filter water based paint particles from the air passing through. These overspray collectors become matted and block essential air flow. They quickly load and must be changed constantly.

Now, there's an overspray collector developed specifically to handle water based paint particles:

In keeping with its tradition of responding to spray booth problems with specific product solutions, Chemco has developed a non-soluble overspray collector that assures high efficiency filtering of water based coatings. The AQUA-PAD will outlive and outperform any other overspray collector in a water based coating environment.

The CHEMCO ADVANTAGE

CHEMCO'S AQUA-PAD™

THE PAINT OVERSPRAY COLLECTOR DEVELOPED
SPECIFICALLY FOR WATER BASED COATINGS.

Two basic types of **AQUA-PADS** are currently available:

AQUA-I

With its special non-soluble, spun-woven construction, the AQUA-1 Pad is a cost-effective overspray collector for the majority of multipurpose baked and air dry types of water based coatings.

SIZES

AQUA-PADS are available in the following standard sizes (inches):

20 x 20 x 2	16 x 20 x 2
20 x 25 x 2	16 x 25 x 2

AQUA-PADS are also available in blanket or roll form in virtually any length and in widths ranging from 12" to 96".

If volume permits, individual pads can be cut to any size required.

AQUA-II

With its more dense spun-woven media and non-soluble polyester backing, the AQUA-II is designed specifically to remove and retain the heavier overspray particles - including water based high solids - from the air being vented from the booth. AQUA-II removes 99.8% of all paint particles and holds up to two pounds of particles per square foot without significantly restricting air flow. No other overspray collector on the market comes close to providing the high filtering efficiency and longevity of the AQUA-II.

SATISFACTION GUARANTEED

TRY AQUA-PADS WITHOUT RISK.

As with all of its products, Chemco **guarantees** your satisfaction. If you are not satisfied that AQUA-PADS perform as described, just tell us why and we'll cancel our invoice!
