SERIES 65™ TACKY FILTER

The Series 65™ Tacky Panel is a filter designed for velocities of 300 to 400 FPM. It is constructed of a 1/2 “ dry face layer, and a 1” super tack second layer. It is a sturdy and heavier alternative to our Series 55™ filter for use in cross draft applications.

INTAKE FILTERS

ADVANTAGES

- Low initial resistance
- High dust holding capacity
- Unaffected by humidity
- Heat sealed construction
- Available in panels and links
- Test results available upon request
- U.L. Class 2
