

# CHEMCO MANUFACTURING COMPANY INC.

*Global Providers of Industrial Finishing Solutions*

## HEADQUARTERS:

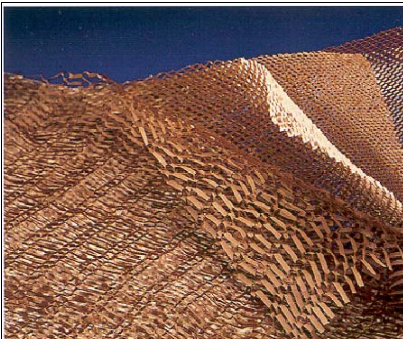

515 Huehl Road  
Northbrook, Illinois 60062-2336

OFFICE WEB SITE: <http://www.chemcomfg.com>

PHONE 800-323-0431 FAX 800-336-7706

## CHEMCO EXPANDED PAPER OVERSPRAY COLLECTORS

Chemco's expanded paper, exhaust- paint collectors are specifically engineered to achieve high efficiency and holding capacity in a wide range of applications . These high performance filters are versatile enough to be able to capture a variety of coatings ranging from lacquers to bake-dry enamels and other conventional finishes. For maximum longevity and capture efficiency, two pads can be used in tandem.

*Expanded Paper Paint Arresting Filter Media*

The front pad is discarded at the end of its useful life and the rear pad moved in its place. A new filter is placed behind the front filter.

**8 Layer Paper Media** is designed for use in heavy coating applications. It is excellent in capturing adhesives, stains, gel and tar-like coatings. The filter's wide open air-entry layers ensure complete depth loading. Extended life of the 8 layer media eliminates the need for two filter tandem rotation, resulting in minimal change out maintenance.

**6 Layer Paper Media** consists of multi-layered slits of expanded Kraft. The 3 stage structure is ideal for capturing air dry enamels, primers and stains. In general applications, the media helps prevent semi-dry airborne particles from settling on already finished parts. This filter's high holding capacity prolongs the service life of the filter, increasing valuable production time.

## PAPER-POLY OVERSPRAY COLLECTORS

**5 Layer Paper** is enhanced with polyester backing to provide maximum paint holding capacity and efficiency. The Kraft Paper-Poly media is highly effective in operations where high-solids, bake enamels, water-borne or tacky coatings are being sprayed. Slower air velocity aids in transfer efficiency of overspray particulates. In appropriate process conditions, this media's efficiency rating consistently reaches 99% , keeping finishing operations EPA compliant.

*Paper-Poly Paint Arresting Filter Media*

EVERYTHING YOU NEED TO MAINTAIN A SAFE, EFFICIENT SPRAY BOOTH OPERATION  
PAINT OVERSPRAY COLLECTORS • PEELABLE WALL COATING • FLAME RETARDANT FLOOR COVERING •  
POWDER AND DUST CARTRIDGES • AIR FILTRATION • SPRAY BOOTH ACCESSORIES •
