POLYESTER FILTER MEDIA

Manufactured from 100% synthetic fibers, which are formed into a high loft blanket that is designed to achieve a low initial resistance and high paint or powder holding capacity. The media provides excellent performance as a prefilter to medium and high efficiency filters or as a stand-alone filter in Paint & Powder Overspray Collection applications which require high capture efficiencies. The media is available in pre-cut pads and bulk rolls.

Spun woven polyester is not affected by moisture and therefore is a perfect choice for high humidity or intermittent moisture conditions.

POLYESTER MEDIA CHART

PRODUCT	EFFICIENCY	HOLDING CAPACITY	APPLICATION
N POLY 1"	MODERATE	MODERATE	Liquid-High Solids, Lacquer, Quick Dry Coatings
U POLY 1"	MODERATE TO HIGH	MODERATE	Liquid-High Solids, Lacquer, Quick Dry Coatings, Powder Prefilter
CHEMLOFT 2"	HIGH	HIGH	Liquid-High Solids, Lacquer, Quick Dry Coatings, Prefilters powder and air filtration, Dust Collection

EVERYTHING YOU NEED TO MAINTAIN A SAFE, EFFICIENT SPRAY BOOTH OPERATION
 PAINT OVERSPRAY COLLECTORS • PEELABLE WALL COATING • FLAME RETARDANT FLOOR COVERING •
 POWDER AND DUST CARTRIDGES • AIR FILTRATION • SPRAY BOOTH ACCESSORIES•
